

To the FCC-  
MX radio is a service people pay to have to be able to benefit from. My husband travels often for his work and it's very beneficial to have this information before a business trip. I feel it's wrong the National Association and Broadcasters think they should be able to dictate what we're permitted to listen to, especially since we pay for the service.

I respectfully request you to reject the NAB's petition 04-160.

Thank you.
